

# Thinflex

Infrared Floorheating

## THINFLEX ISULATION TAPE

With this high-quality butyl tape you can securely insulate infrared heating films on both sides, as shown in picture.

Before sealing, make sure the power cable sits secure on the heating film and is clean and dust free. Press both tapes together with your fingers to push the air bubbles outside.

## Features

protect against dust, moisture and corrosion

synthetic rubber adhesive

self-adhesive

Sealing temperature: from + 5C ° to + 35C °
